

**3 MORSE IN UNA
VISSES IN ONE**

Art. 810W

Ganascia mobile oscillante zigrinata da un lato, con albero a gradino (Art. 810Z)
Floating movable jaw one side serrated with step block pin (Art. 810Z)

Art. 810Z

Albero a gradino per ganasce mobili oscillanti
Step block pin for floating movable jaw

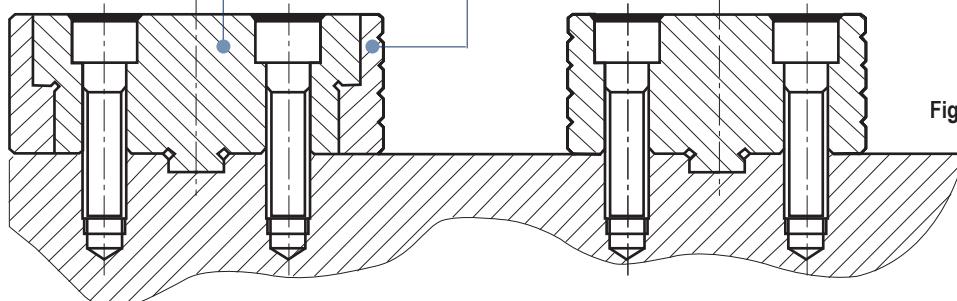

Fig. 1 Pic. 1

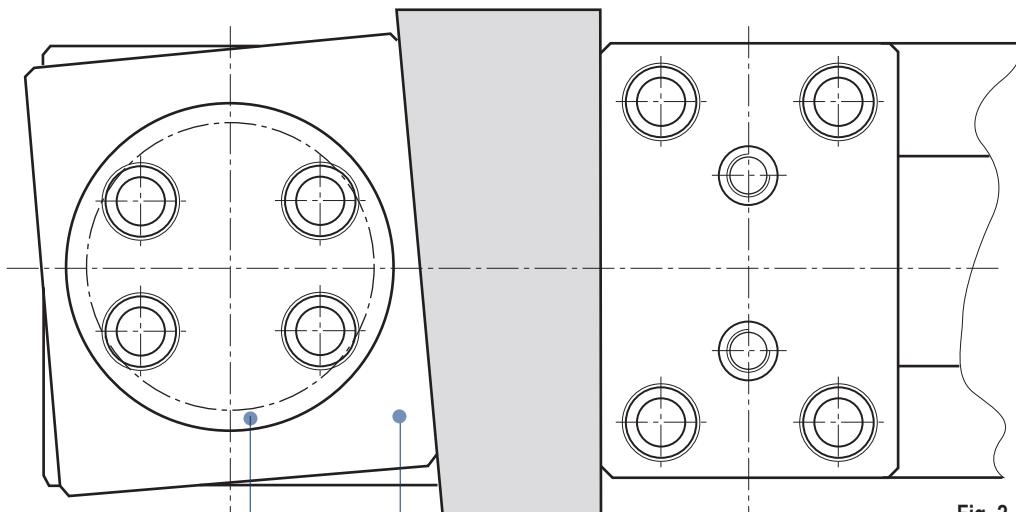

Fig. 2 Pic. 2

Albero a gradino per ganasce mobili oscillanti
Step block pin for floating movable jaw

Ganascia mobile oscillante zigrinata da un lato, con albero a gradino (Art. 810Z)
Floating movable jaw one side serrated with step block pin (Art. 810Z)

Art. 810Z

Art. 810W

Le ganasce mobili oscillanti consentono il serraggio di pezzi di forma irregolare i cui lati non risultino paralleli (**Fig. 2**).

Questo è reso possibile dall'albero a gradino (**Art. 810Z - Fig. 1**), posto al centro della ganascia, che pur permettendo la rotazione della ganascia, ne mantiene la precisione ed evita il sollevamento del pezzo mentre viene lavorato.

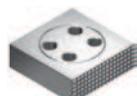

Il tutto a garanzia di un serraggio in piena sicurezza.

Floating movable jaws allow to clamp workpieces with irregular shapes whose sides are not parallel (**Pic. 2**).

In fact thanks to the step block spindle (**Art. 810Z - Pic. 1**), positioned in the centre of the jaw body, the jaw can float and guarantee at the same time maximum precision and no tilting of the parts while being worked.

The safety of the workholding is guaranteed.
